HVBD8 SERIES

High Voltage Battery Disconnect

800A CONTINUOUS DUTY

1500VDC SYSTEM VOLTAGE

APPLICATIONS

- HV Battery Systems
- Heavy Truck
- Off-Road Vehicles
- Electric Vehicles
- Marine
- Emergency Vehicles
- Construction & Mining

FEATURES

The Next Level in Battery Disconnect Technology

- Robust Metal-Ceramic Hermetic Seal
- Industry Leading Dielectric Withstand Voltage
- High Temperature Performance
- *Ultra-Low* Contact Resistance over Life
- Ready for Harsh Environments
- Designed for OSHA compliant Lockout/Tagout (LOTO)
- Optional Integrated Auxiliary Contacts
- *Patent Pending*
- CE compliant
- Designed and Assembled in the USA

PERFORMANCE

TABLE 1. SPECIFICATIONS

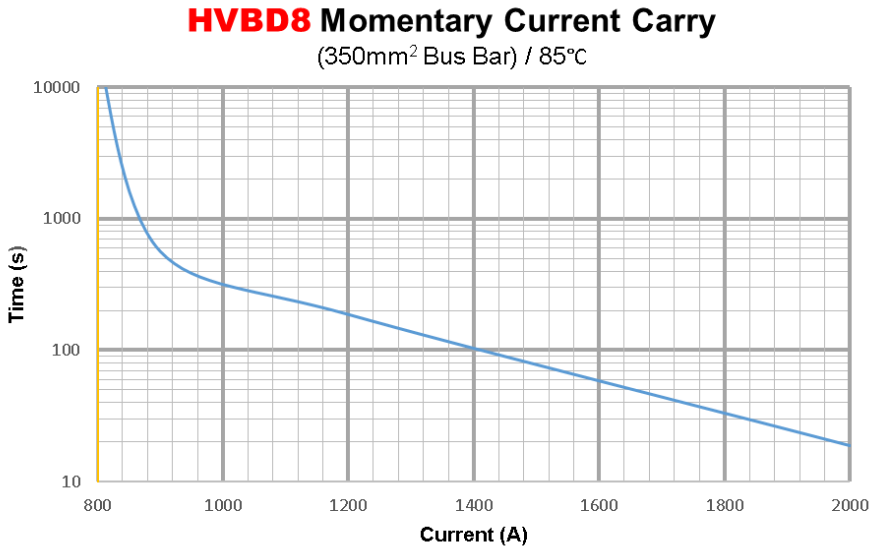
CHARACTERISTIC	MEASURE
Contact Arrangement	Form X, SPST
Operating Voltage[1]	Up to 1500VDC (No Switching Under Load)
Dielectric Withstand Voltage	5,375VDC, 1 minute
Continuous Current [2]	800A continuous (350mm^2 Bus Bar)
Overload Current[2]	See graphs on next page
Make and Break[1] (400A @ 24VDC)	5,000 cycles
Contact Resistance (Measured at 200A)	Typ:0.06mΩ, Max: 0.120 mΩ
Min Insulation Resistance	100MΩ
Shock, 1/2 Sine, 11ms	25G
Vibration, Sinusoidal (10-500Hz Peak)	4G
Vibration, Sinusoidal (500Hz-2000Hz Peak)	20G
Operating Temperature[2]	-55˚C to 85˚C
Ingress Protection (Sealed Contacts)	Exceeds IP69, (Hermetically Sealed)
Ingress Protection (Housing Feedthrough) [3]	IP67
Weight	425g
Case Material	PA GF
Switch Lever Material	PA GF
Mounting	100mm | C:C, 2X M8
Mounting Position	Any
Auxiliary Contacts	SPDT, 3A Continuous Duty

[1] The HVBD is designed to isolate at voltages up to 1500VDC. The HVBD is not intended for make/break switching above 100V.
[2] 170˚C max terminal temperature.
[3] Gasket and or RTV required for feedthrough applications where IP67 is required at the housing flange mounting feature.

PERFORMANCE (cont.)

Application Notes

- 170°C Max Terminal Temperature
- 350mm² Bus Bar
- Graphs provided for design reference; user to verify system temperatures



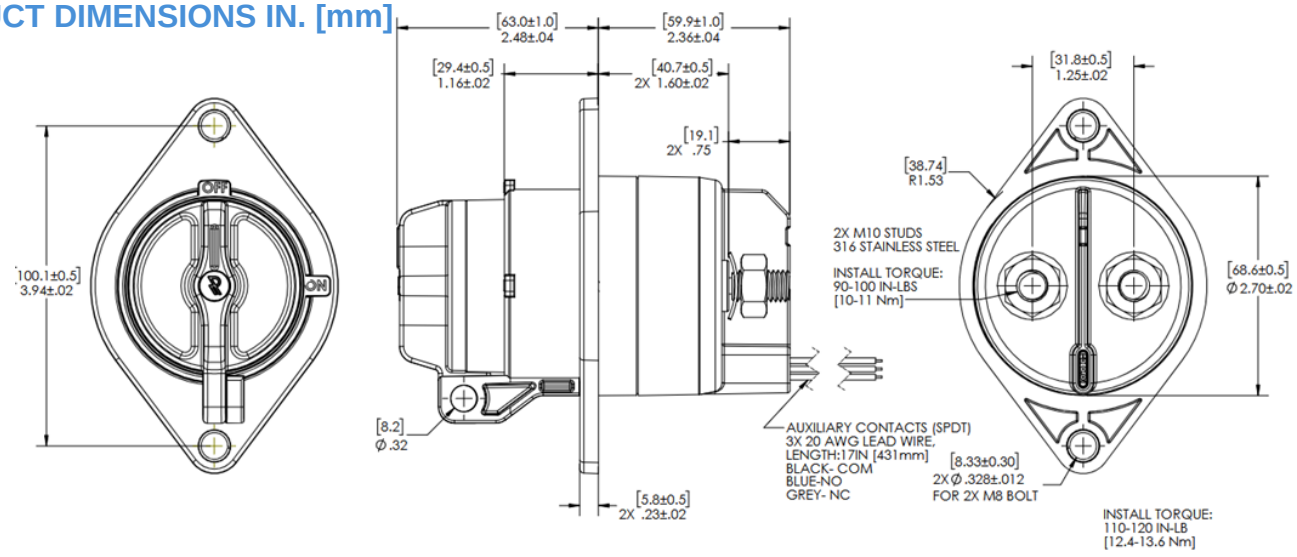
OPTIONS

TABLE 2. PRODUCT NOMENCLATURE				
	CURRENT RATING	MOUNTING	AUXILIARY CONTACTS	HANDLE COLOR
HVBD	**8** 800 Amp	**A** 100 mm C:C	**A** Included	**R** Red
			X None	**B** Black

Optional SPDT auxiliary switch details

- Main contacts close before auxiliary contacts when switching from OFF to ON
- Auxiliary contacts open before main contacts when switching from ON to OFF
- IP67 sealed
- Auxiliary contacts rated to (3A @ 12VDC 100k cycles)

PRODUCT DIMENSIONS IN. [mm]



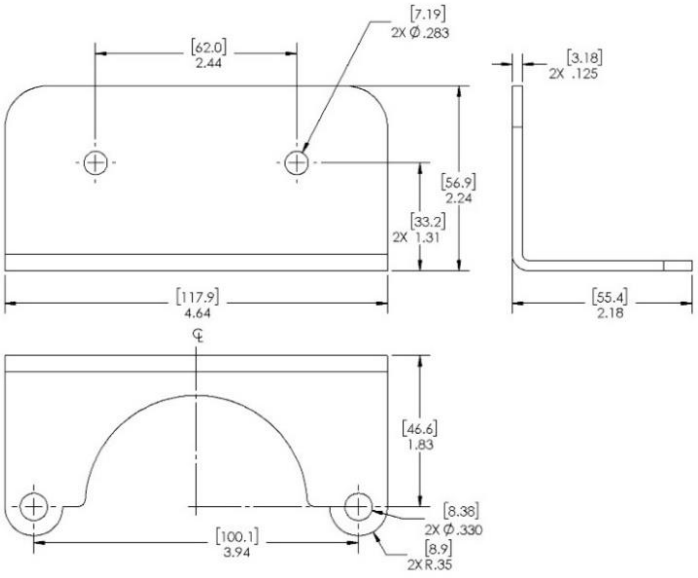
AVAILABLE ACCESSORIES

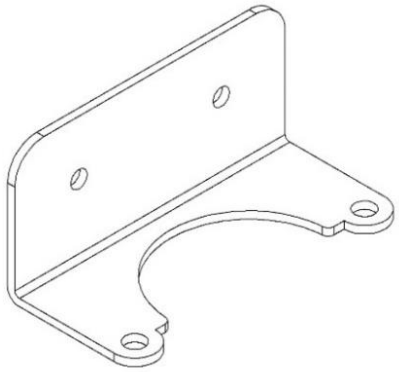
LOTO Padlock

- Safe operation requires the use of an OSHA certified lockout/tagout (LOTO) padlock to ensure the switch remains in the off position
- Lockout Tagout Padlock Requirements:
  - Shackle DIA: 9/32”
  - Vertical Clearance: 3/4”
  - Horizontal Clearance: 5/8”
- Contact Rincon Power for OSHA certified lockout tagout padlock

RP2099 Mounting Bracket

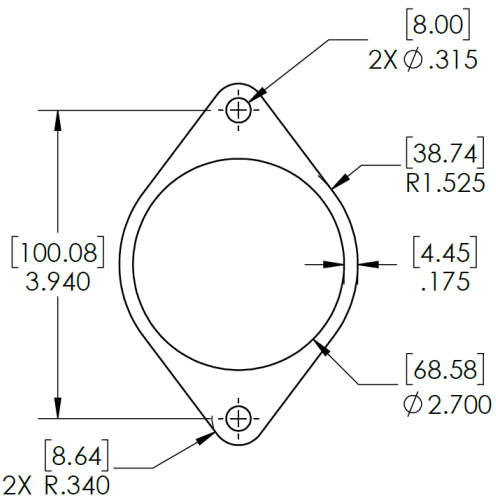
- Allows for 90-degree mounting

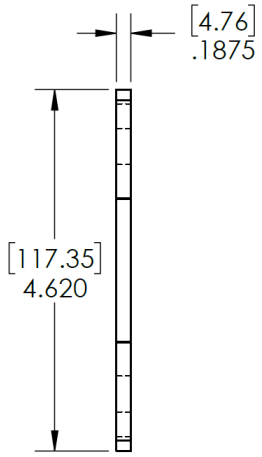




AVAILABLE ACCESSORIES (cont.)

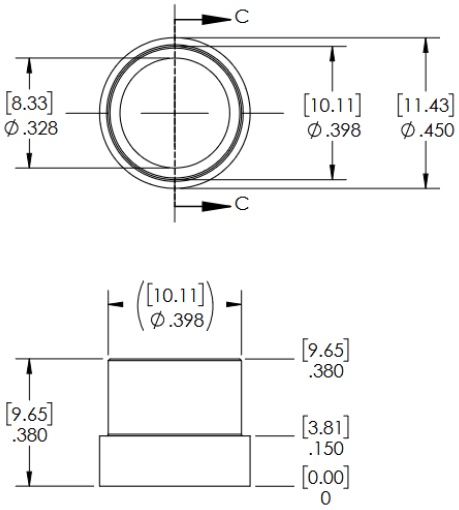
RP2127 Mounting Gasket

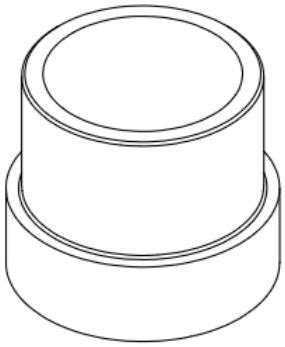




MATERIAL: SILICONE, DUROMETER 20A, COLOR: BLACK

RP2286 Compression Limiter





MATERIAL: 304 STAINLESS STEEL

Gasket Application Notes:

For surface mount applications that require IP testing we recommend the following installation steps to ensure a robust seal is created.

1. Surface finish of VDI121 or lower for mounting surface
2. Clean surface with isopropyl alcohol to remove contaminates
3. Remove the original low profile compression limiters (Figure 1) from HVB housing and replace them with RP2286 Compression limiters (Figure 2 / 3)
4. Apply bead of silicone adhesive around DUT thru hole (we recommend Dowsil 739)
5. Install gasket on DUT and Compression Limiters
6. Insert DUT into the mounting surface thru hole with the mounting fastener holes aligned with the mating fastener holes in the mounting surface
7. Install the mounting fasteners lightly to evenly seat the device and gasket on the bead of silicone previously applied and the mounting surface
8. Apply an installation torque of 110-120 in-lb to the mounting fasteners
9. Allow up to 72hrs @ room temperature for the silicone RTV to cure before testing

Legal Disclaimer Notice for Rincon Power, LLC Datasheet

This legal disclaimer applies to purchasers and users of products manufactured by or on behalf of Rincon Power, LLC ("Rincon"). Unless otherwise expressly indicated in writing, Rincon's products, product specifications and data sheets relating thereto are subject to change without notice. Users should check for and obtain the latest revision information and verify that such information is current and complete before placing orders for Rincon's products. Users should always verify the actual performance of the Rincon's products in their specific systems and applications.

Except as expressly set forth in the relevant purchaser order terms and conditions or applicable agreement, Rincon makes no warranty, representation or guarantee regarding the products, expressed or implied, including, but not limited to, a warranty of merchantability or fitness for a particular purpose. To the maximum extent permitted by applicable law, Rincon disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

In no event shall Rincon be liable for any incidental or consequential damages resulting from the use, misuse or inability to use the product. This exclusion applies regardless of whether such damages are sought based on breach of warranty, breach of contract, negligence, strict liability in tort, or any other legal theory.
